

## Immunohematology Practical Workshops

For blood bank technicians

### Level 2

#### Course Objective

These workshops will enable you to apply the theory covered in the theoretical training, as well as contextualize certain typical cases through case studies. The workshops take place at Héma-Québec's facility on the Université Laval campus in Quebec City.

#### Training Program

- Antibody screening and identification
- Adsorption
- Elution
- Determination of phenotypes after antibody dissociation

#### Duration and terms

7 hours of practical training - Onsite

Prerequisite: Completion of the theoretical training in erythrocyte immunology - Level 2

Level 2 courses are offered in English and French.

A travel reimbursement program is available for these workshops. This reimbursement program applies only to participants residing outside Quebec City, but within the province of Quebec.

**Hold these practical workshops in your physical workplace !**

Certain conditions may apply and

Offered according to the availability of our trainers.
